## DEFINITIONS

The estimates in this report relate to sales by commercial producers. Only commercial producers growing one or more of the four cut flowers (carnations, chrysanthemums, gladioli, or roses), potted chrysanthemums or foliage plants are included in this report.

A change in the definition of a commercial producer is effective with all 1974 data. A commercial producer is defined as one who produces and sells \$10,000 or more of fresh (cut) flowers, flowering and foliage plants, bedding plants and cultivated florist greens in one year. Previously the definition of a commercial producer included growers who sold \$2,000 or more of the above mentioned items.

The table below shows for 1973 the 23-State totals by commodity for number of growers and quantity sold using a comparison of the old with the new definition. The change in definition is significant in terms of number of producers but changes in production generally accounted for less than one percent reduction in quantity sold. For additional comparisons each commodity table in this report also shows the estimated number of 1973 grower numbers by State using the old and new definitions.

Value data for cut flowers are on a "gross wholesale" basis and deductions have not been made for selling commissions and transportation costs. Total sales in each State are converted to their equivalent wholesale value using reported average wholesale prices. Foliage plant sales are on a "net sales" basis and are derived in each State by subtracting the cost of plant materials purchased from other growers from the gross value of sales. Sales times average price does not necessarily equal the published wholesale value, since the published average price is derived from unrounded totals.

This report includes revised estimates for 1973 and preliminary estimates for 1974.

## FLOWERS AND FOLIAGE PLANTS - 1973

## FLOWERS AND FOLIAGE PLANTS

### Production and Sales, 1973 and 1974; and Intentions for 1975 in Selected States

Total value at wholesale of four important flower and foliage plants in the 22 major producing States in 1974 totaled \$345 million. The 1974 value excludes data for the State of Delaware and for producers with gross sales below \$10,000. The total wholesale value in 1973 for the 23 States, including Delaware and all producers with gross sales above \$2,000, was \$296 million. Sales of cut carnations, gladioli, roses and chrysanthemums, plus potted chrysanthemums grown in 22 States in 1974 had a wholesale value of \$234 million, while net sales of foliage plants at \$111 million was almost two-thirds above 1973 sales.

California continued as the leading producer of carnations, standard chrysanthemums, potted chrysanthemums, and roses. California also became the top producer of pompon chrysanthemums. Florida was the leading producer of gladioli and foliage plants. Based on total wholesale value of the four cut flowers and potted chrysanthemums, California ranks first with \$80 million in sales, followed by Florida with \$27 million, and Colorado with \$20 million. Based on the net wholesale value of sales for foliage plants, Florida leads with \$48 million, followed by California with \$31 million.

Of the 3,289 producers surveyed, nearly two-thirds had sales of under \$100,000, 20 percent had sales of \$100,000 to \$250,000 and 15 percent had sales of \$250,000 or more. Additional percentage distributions by size groups are shown in Table 14.

**Note:** Acres used for production of gladioli and square feet in production for foliage are reported totals used for production. Average gross square feet reported for all carnations, standard chrysanthemums, pompon chrysanthemums, potted chrysanthemums and all roses, is based on average gross area used during the year to produce these crops. For example, if 32,000 sq. ft. of greenhouse space was refilled three times during the year and the same crop grown each time the grower would have reported 32,000 sq. ft. of greenhouse space used to produce this crop. See Table 13 for a detailed listing by crop and State.

#### POTTED CHRYSANTHEMUMS

Potted chrysanthemum growers in the 22 States plan to increase 1975 production 4 percent from the previous year and 9 percent over the 1973 level. Twelve States intend to expand production for 1975 while others intend no change or some decrease from 1974.

The total of 21.6 million pots sold in 1974 represented a 5 percent increase in volume and a gain of 13 percent in value from the previous year. The average wholesale price per pot in 1974 was \$1.78 compared with \$1.66 a year earlier. California continues to be the leading State in both sales and value.

#### POMPON CHRYSANTHEMUMS

Growers in the 22 States surveyed indicate a 6 percent decline in the number of pompon plants expected for production in 1975. California intentions are up 1 percent from 1974 while Florida expectations are down 14 percent.

Sales in 1974 in the 22 States were 5 percent more than the previous year and totaled 37.9 million bunches. California, first among States in production in 1974, sold 17.4 million bunches or 46 percent of the 22 State total. Florida was second with 11.4 million bunches or 30 percent of the total. Of the 37.9 million bunches sold, 90 percent were sold at wholesale.

#### STANDARD CHRYSANTHEMUMS

Standard chrysanthemum producers in the 22 States report intentions to produce 6 percent fewer plants in 1975 than last year. California growers intend to decrease production 6 percent below 1974 output.

In 1974, growers in the 22 major States sold 144 million blooms from 130 million plants. The number of blooms sold was 4 percent more than 1973 sales. California was first in sales with 89 million blooms or 62 percent of the total followed by Ohio and North Carolina, with 12 and 9 million blooms, respectively.

## GLADIOLI

Gladioli growers in the 22 States surveyed indicate plans for an 8 percent increase in acreage for 1975. In Florida, the major State, intentions are up 13 percent from 1974.

Florida, with 151 million spikes sold in 1974, accounted for more than two-thirds of the 22 State total. California sales were second with 25 million spikes, followed by New Jersey with 19 million. Wholesale sales made up 99 percent of total sales. The total value at wholesale in 1974 was \$18.8 million for the 22 States, and the average price per spike was 8.4 cents. The wholesale value of sales in 1973 was \$19.5 million with an average price per spike of 8.3 cents.

## CARNATIONS

Growers in 1975 plan to reduce production of carnation plants 5 percent. California growers expect to reduce production 5 percent while Colorado plans to continue 1975 production about the same as in 1974.

In 1974, growers in the 22 States sold 745 million blooms from 66 million plants. The number of blooms sold was one percent more than the previous year. California producers sold 457 million blooms accounting for 61 percent of the 22 State total. Colorado growers, with 26 percent of the total, were second with sales of 193 million blooms. Pennsylvania and Massachusetts growers each sold 20 million blooms. Wholesale value of 1974 sales in 22 States was nearly \$49 million. The average price of 6.5 cents per bloom in 1974 compared with 6.7 cents in the previous year.

Standard carnations accounted for 81 percent of all carnation sales in the 22 States. Total wholesale value of standard types in 1974 amounted to \$44 million. The average price of 7.3 cents per bloom in 1974 compares with the previous year average of 7.5 cents per bloom. Growers in the 22 States plan a 5 percent decrease in production for 1975.

Miniature carnations made up 19 percent of total carnations in 1974. Value of sales, at \$4.6 million, was up 26 percent from last year's \$3.6 million. Average price per bunch in 1974 was \$1.18 compared with \$1.11 in 1973. Growers plan to decrease production by 5 percent for 1975.

## ROSES

Rose growers in the 22 States report plans to increase the number of plants in 1975 by 8 percent over 1974. California producer intentions are 13 percent above 1974. Among other major States, Illinois, Indiana and Pennsylvania growers expect to increase production 2 percent. In Massachusetts an increase of 4 percent is expected.

In 1974, there were 443 million blooms sold in the 22 States. This was 6 percent above the total sold in 1973. California growers sold 174 million blooms, 39 percent of the total. Pennsylvania was second with sales of 42 million followed by Massachusetts with 28 million blooms and Indiana with 27 million.

The value of rose sales in 1974 was \$68 million, 10 percent more than a year earlier. The average price in 1974 was 15.3 cents per bloom compared with 14.8 cents the previous year.

Grower plans indicate Hybrid tea rose output for 1975 will be 6 percent above 1974 while a 16 percent increase is expected for miniature or sweetheart rose plants. Hybrid tea roses accounted for 72 percent of all rose sales. The average price for Hybrid tea roses was 16.8 cents per bloom and 11.5 cents per bloom for miniature roses.

## FOLIAGE PLANTS

Foliage plant growers intend to expand the area used in production for 1975 to 72 million square feet or 13 percent more than the 1974 total. Area in production has increased annually since 1968. If 1975 intentions are realized, the area used will be almost two and one half times larger than the 1968 level. All States except Connecticut plan an increase in 1975 over the previous year.

Net value of sales in 1974 totaled \$111 million - up 64 percent from a year ago. Florida accounted for nearly 44 percent of the 22 State total net value with 74 percent of the square footage in production. California ranked second behind Florida as the leading foliage plant State.
